

# Data Management Employee Portal

Information Asset provides an employee portal solution for data management professionals. The portal includes several useful features:

- A customizable user interface that can be branded for your company
- Quick links, favorites, news and announcements, a wiki, and a knowledge base
- Search capabilities for third-party data catalogs from Alation®, Collibra®, IBM®, and Informatica®
- Role-based access to control who sees what
- Support for single sign-on (SSO) with Security Assertion Markup Language (SAML) and OpenID® Connect

Figure 1 shows the home page of the portal and a list of favorite links for quick access to important external applications.

Figure 2: Employee Portal Knowledge Base

Information Asset’s data management portal enables organizations to:

- Provide a gateway to the myriad applications used by data management professionals
- Provide a knowledge base, wiki, news, and announcements for all data management employees in a centralized location
- Promote use and adoption of your existing data management tool portfolio by exposing those tools through the portal
